REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-5, 8, 14-21, 23-24, 26-28, 33, 37-41, 47, 63, 65 are allowable over the prior art of record because no reference was found teaching a negative electrode having a substrate (current collector) having a mean roughness of 30-4000 Å with a lithium layer coated on the substrate where the substrate is selected from the materials cited in claims 1, 63 or 64.

Kusumoto et al. (6,946,223) teaches a substrate with a mean surface roughness Ra of not less than 0.2 µm but the negative electrode material is a slurry of silicon powder having a negative collector comprising a metal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
